...making excellence a habit™

TUFNOL COMPOSITES: East Kilbride SCOPE:

The Machinist

The Company's continuing response to the needs of industry has resulted in the establishment, at its East Kilbride works, of a comprehensive facility for the production of machined and fabricated plastic components.

It produces machined components not only from the range of engineering plastics that is manufactured at the Tufnol Composites Ltd - Birmingham works, but also from a wide range of materials, which includes thermoplastics.

Over the years the Company has built a reputation for quality and high standards resulting from a continued investment in skilled people and in the latest equipment and technology.

The Distributor

The Company's business is in plastics for engineering. It distributes a range of engineering plastics materials in the semi-finished form.

In addition to Tufnol laminates, there are vulcanised fibreboards, glass mat polyester materials, engraving laminates plus a full range of engineering thermoplastics. This range includes acetal, nylon, rigid polyurethane, polycarbonate, polyethylene, PTFE and PVC.

These materials are available nation-wide and can be supplied in standard forms, cut to size or as machined parts. For engineering plastics in standard forms the Company provides a total service.
